DATA PROCESSING

in business and industry

VOLUME 4

List of contents and subject index for 1962

The list of Contents gives the page numbers, titles and synopses of articles published during 1962. An item in the Subject Index is cross-referenced to the list of Contents by the page number in which the reference appears. For example, the item "Address master cards" is stated in the Subject Index to appear on page 69; reference to the Contents shows that page 69 is in the article "Statistics from mailing lists"

FOR TOP MANAGEMENT AND CHIEF EXECUTIVES

CONTENTS FOR 1962

Number 1 January-March

2 **Japanese National Railways electronic booking system**
a computer answers passengers' inquiries and reserves individual seats on mainline express trains

10 **Transaction recorder**
a manually operated machine which simultaneously prints and punches information in 80-column cards

16 **Magnacard**
a large capacity information store of unusual design from which data can be retrieved at random

26 **KDN 2**
a new small general-purpose computer

30 **Telephone accounting**
compiling telephone bills directly from marked call tickets prepared by telephone operators

38 **Capturing invoice data at source**
automatic keypunches controlled remotely by keyboard accounting machines

46 **Data processing topics**
comments on new equipment and important applications

48 **Centralized book-keeping**
how a bank keeps current account records for twelve branches at a computer centre

56 **Leo III**
a new solid-state computer containing micro-programmes held permanently in a magnetic-core store of special design

62 **Recording computer output data on microfilm**

64 **Automatic verification of account numbers**

Number 2 April-June

68 **Statistics from mailing lists**
printed addresses transferred directly from punched cards which can later be analysed to produce circulation and other statistics

74 **A computer in the public transport industry**
compiling vehicle performance and route revenue figures on a punched-card computer

84 **How fast can a digital computer compute?**
some factors to be considered when assessing the merits of data processing systems

86 **Punched-card operated business machine systems**
automatic programme control unit for connecting an 80-column card reader to electrically actuated business machines

90 **Compiling an airline guide by computer**

100 **New high-speed magnetic-tape unit for digital computers**

104 **Honeywell 800 and 400 computers**

112 **Electronic accounting**
productivity increased fourfold by updating purchase and sales ledger records on electronic accounting machines

122 **Data processing topics**
comments on new equipment and important applications

124 **Unimate—a machine with a memory**
a mechanical handling device controlled automatically by commands recorded on a magnetic drum

126 **40-column punched-card computer**
a new general-purpose computer suitable for the smaller business organization

Number 3 July-September

132 **Stock control on a Sirius computer**
rapid installation of small £30,000 machine for stock control work

140 **Planning and controlling technical examinations by computer**
performance of candidates assessed by National-Elliott 405 data processing system

149 **Pocket size card punch**

150 **Credit sale accounting on a computer**
70,000 account records maintained, and reminder letters automatically prepared for customers in arrears

162 **Document reading machine**
handmade marks automatically transcribed into punched paper tape

170 **Accounting for seven million books a year**
small computer installation used by publisher of paperback books

181 **Data processing topics**
comments on new equipment and important applications

184 **I.C.T. 1500**
a magnetic-tape computer designed for commercial work

192 **Simulating traffic flow patterns on a computer**

Number 4 October-December

198 **Insuring data processing equipment**
points to be considered, risks to be covered

200 **Handling stock orders for 500 shops**
magnetic marks on punched cards interpreted automatically; application by German Co-operative retail sales organization

210 **Data processing comes to parking**
car parking fees computed automatically in the U.S.A.

214 **Preparation of punched-card bills**
telephone accounts in Holland are presented on punched-card bills that can be read by machine on their return

224 **A small punched-card calculator**
suitable for the smaller business or subsidiary organization

228 **Operating costs and earnings analysed**
40-column punched-card equipment utilized to keep a check on the commercial profitability of a group of small companies

237 **Diagnosing circuit faults automatically**
a system indicates which of its components is unserviceable

238 **Data processing topics**
comments on new equipment and important applications

242 **Computing bills of quantities**
a new computer service for the building industries; costing, planning and budgetary control may develop from this procedure

254 **Maintaining pension records for 26,000,000 people**
account of the work performed by The Ministry of Pensions and National Insurance on a large Emidec 2400 installation
